

The Pumps with Nine Lives

Model: [701541](#)

Pulsation Dampener-Rebuild-FPM

Specs

Max Flow: 15 gpm

Min Pressure: 200 psi

Max Pressure: 4300 psi

Inlet Port Size: 0.5

Discharge Port Size: 0.5

Type of Accessory: Pulsation Dampener

Material: Stainless Steel (SS)

Description:

This valve is designed to reduce pressure fluctuations or pulsation common in all positive displacement pump systems. It must be nitrogen pre-charged prior to installation on the discharge side of the pump. It is a replaceable bladder design constructed of 316SS with an FPM bladder for special fluid compatibility. It will prolong the life of the pump and system components by reducing pulsation to + or- 3%. [See optional NBR and EPDM versions]

Accessory to be used with these Pumps:
