

## EXPERTS IN **FLUID FILL SYSTEMS**

We create semi-automated systems to dispense hazardous or non-hazardous liquids in small but precise amounts to test a large range of vehicles and systems during the manufacturing

## No Matter the Vehicle, We've Got You **COVERED**

Automotive

Non-Standard Vehicles

Recreational Vehicles/  
Small Engines

Large Trucks/  
Military

Agricultural Vehicles

Off-Highway  
Productivity Vehicles

### Fluids We Handle

- A/C Fluid
- Air Suspension
- Axle
- Brake
- Coolant
- Diesel
- Diesel Exhaust Fluid
- Engine Oil
- Gasoline
- Power Steering
- Transmission
- Windshield Washer

## The Anderson Process **DIFFERENCE**

Measure fills of a minimum 1 ounce at +/- 5% accuracy.

Saves your plant unnecessary costs of excess fluid.

Superior quality, simple to use and highly accessible for maintenance.

Maximizes uptime, helping you hit production goals and boost your profits.

Place nozzle into tank or reservoirs, press a button and walk away.

Allows workers to increase labor efficiency in a safer, more ergonomic fashion.

Our manufacturing control lets us meet aggressive timelines.

Keep tight schedules on track to hit your production start date.

We have more direct control over our manufacturing than close competitors... from **START** to **FINISH**.

Choosing Anderson Process Gives You **BETTER...**

Lead Time Control

Serviceability

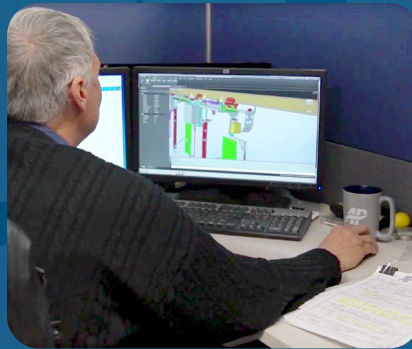

Customization

Higher Quality System

## Our Custom Fluid Fill Systems Give You MORE CONTROL

We control every step of the process in-house, which allows us to meet even the most aggressive timelines without compromising our superior quality.

We can visit your plant to do an accurate and thorough health assessment to suggest the best options for your exact specifications to optimize your processes.

Our custom-made Fluid Fill Systems are made with high-quality components, which mean they can handle the daily grind and keep your production line running smoothly.

## It's Not Just Fuel. **WE'RE EXPERTS IN...**

- Control Panel Design and Build
- Chiller and Heat Exchanger Systems
- Evacuation and Fill
- Vapor Recovery
- Engineered Skid Systems
- Chemical Blending Systems

Schedule a Health Assessment to Explore the Best Options for **YOUR SYSTEM**.
